

OPTIMA²²

PREMIUM PLANT NUTRITION

BENEFITS OF OPTIMA²²:

Aids in:

- Increased cell division induces faster growth
- Plant respiration which increases the efficiency of energy transfer
- Improved photosynthesis, the energy source of plants
- Protein, sugar, and enzyme conversion

CONTAINS THE COMPLETE NUTRITIONAL PACKAGE:

- Complex Nitrogen forms ensure stable availability throughout all plant growing stages.
- Readily available phosphorous improves seed germination and emergence and builds a larger root system.
- Natural oils and proteins contained in OPTIMA²² provide excellent food sources for soil worms, mycorrhiza, and microbes. Biologically alive soil helps plants endure stress and drought conditions.
- Naturally occurring calcium leads to better spring growth promotes plant uniformity, improves nutrient uptake and ensures healthy plant tissue.
- Adds trace minerals, (boron manganese zinc, iron) or (micro-nutrients) into the soil.

CONTAINS:

OPTIMA²² is an organic aquatic-based fertilizer with beneficial microbiology. It is a complete fertilizer containing all the essential nutrients plants need to grow and thrive. In addition, OPTIMA²² is enhanced with phosphorus and contains beneficial microbes that help improve soil health and plant growth.

THE BENEFITS OF USING OPTIMA²² FOR YOUR CROPS INCLUDE:

- Increased crop yields
- Improved soil health
- Enhanced plant growth
- Increased resistance to pests and diseases
- Reduced need for chemical fertilizers and pesticides

Contains 2% sulfur, a secondary element, dubbed "the 4th major nutrient," crucial for amino acid, protein, and oil synthesis. Vital for chlorophyll formation, enzyme activation, and vitamin production. Integral to two protein-forming amino acids. Sulfur's importance parallels nitrogen's; both vital for protein and chlorophyll, with sulfur aiding nitrate conversion to amino acids. High nitrogen-demanding crops often require high sulfur levels.

OPTIMA²² is a safe and effective way to improve the health of your crops and soil. It is also a sustainable option that does not contribute to pollution or environmental degradation.

If you are looking for a natural and organic way to improve the health of your crops and soil, OPTIMA²² is a great option. It is a safe and effective product that will help you to grow healthier and more productive crops.
